PROFESSIONAL SUMMARY

Data Analyst | SQL | Power BI | Python | Business Intelligence | EXCEL | ETL

Analytical professional with a Bachelor's degree in Computer Science and hands-on expertise in SQL, Python, and Power BI, specializing in transforming complex data sets into actionable business insights. Proficient in building interactive dashboards, automating ETL pipelines, and conducting end-to-end fraud detection and credit risk analysis across large-scale datasets exceeding 1 million records. Proven ability to identify trends and patterns in data, develop automation solutions, and deliver data-driven recommendations that support strategic decision-making for business partners.

TECHNICAL & FUNCTIONAL SKILLS

Programming	Python, SQL, JavaScript, C, C++
Data Analysis	Pandas, NumPy, Matplotlib, Seaborn, EDA, Statistical Analysis
BI & Reporting	Power BI, DAX, Power Query, KPI Dashboards, Data Visualization, Microsoft Excel (PivotTables)
Databases	PostgreSQL, MySQL
Excel	Advanced Excel, Pivot Tables, Power Query, Power Pivot, VLOOKUP/XLOOKUP, INDEX-MATCH
Data Engineering	ETL Pipelines, Data Cleaning, Data Transformation, Data Validation, Automation Solutions, Web Scraping
Domain	Fraud Detection, Credit Risk Analysis, Risk Modeling, Dashboard Development, Stakeholder Reporting

KEY PROJECTS

I. Banking Fraud Detection & Credit Risk Analysis

(Python, Pandas, NumPy, Power BI, DAX, EDA) [GitHub](#) | [LinkedIn](#)

- Analyzed 500K+ banking transactions using Python EDA to identify fraud patterns and high-risk customer segments, improving fraud classification accuracy by an estimated 18%.
- Built interactive Power BI dashboards with DAX measures tracking fraud KPIs, credit risk exposure, and transaction anomalies, enabling real-time risk mitigation decisions for business partners.
- Conducted end-to-end data cleaning, preprocessing, and statistical analysis to validate data quality and ensure accurate risk modeling outputs.

II. Apple Retail Sales Analytics — 1M+ Records

(PostgreSQL, Advanced SQL, CTEs, Window Functions) [GitHub](#) | [LinkedIn](#)

- Analyzed over 1 million retail sales records using PostgreSQL, applying CTEs, Window Functions, Subqueries, and query optimization to reduce execution time by 40%.
- Identified top-performing products, revenue-driving trends, and customer purchasing behavior, delivering 5 strategic insights to support inventory planning and sales optimization.
- Designed SQL-based analytical workflows to disseminate large-scale data insights, directly supporting data-driven decision-making for stakeholders.

III. Credit Card Fraud Detection & Risk Analytics Platform

(Power BI, DAX, Risk Analytics, Data Transformation) [GitHub](#) | [LinkedIn](#)

- Built a BI platform monitoring 200K+ credit card transactions for fraudulent activity, customer risk profiles, and anomalies — enabling rapid identification of fraud-prone segments.
- Developed KPI-driven dashboards featuring fraud risk segmentation, transaction monitoring, and performance metrics using DAX, improving reporting accuracy for business partners.
- Performed data transformation and validation routines to ensure data integrity across all analytical reporting pipelines.

IV. Vendor Performance & Inventory Analytics System

(Power BI, DAX, SQL, ETL) [GitHub](#) | [LinkedIn](#)

- Designed a BI solution evaluating vendor performance and procurement efficiency, identifying operational bottlenecks and improving inventory utilization insights by 15%.
- Created KPI dashboards tracking inventory turnover, vendor contribution, and supply chain performance, supporting operational planning decisions for business partners.
- Built ETL routines to organize, transform, and validate procurement datasets, ensuring accuracy and consistency across all analytical reports.

PROFESSIONAL EXPERIENCE

Cinute Digital Pvt Ltd (Mumbai)

Data Analyst Intern | Feb 2026– Aug 2026

- **Dataset Consolidation & Cleaning:** Merged and normalized fragmented multi-sheet transaction datasets, eliminating duplicate records and resolving schema inconsistencies.
- **Calculated Metrics & Feature Engineering:** Created custom engineered features (time-based buckets, product category segments, and spend thresholds) to facilitate deeper behavioral analytics.
- **Power BI & Excel Reporting:** Designed interactive executive dashboards mapping product revenue trends, customer purchasing frequency, peak sales hours, and order behavior.
- **Stakeholder Reporting:** Translated complex technical data models into concise visual summaries, aiding management in inventory planning and marketing drive timing.

Bhavan's College (Part-Time / Internship)

Web Development & Management Intern | 2023 – 2025

- Supported digital library database systems housing structured record archives using MySQL queries.
- Performed periodic data auditing checks to guarantee catalog accuracy and assisted administrative staff with automated report generation.

EDUCATION

Bachelor of Science in Computer Science

Mumbai University, Bhavans College | 2023 – 2026

Relevant Coursework: Database Management Systems, Statistics, Data Structures & Algorithms, Programming

CERTIFICATIONS

- Responsive Web Design — FreeCodeCamp (April 2025)
- JavaScript Algorithms and Data Structures — FreeCodeCamp (May 2025)
- Mastering Data Structures & Algorithms Using C and C++ — Udemy (April 2025)
