

Jay Rande

Mumbai, India • +91 9321778286 • jayrandecs@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

SUMMARY

Data Analyst with a Bachelor's degree in Computer Science and hands-on expertise in SQL, Python, and Power BI, specializing in transforming complex data sets into actionable business insights. Proficient in building interactive dashboards, automating ETL pipelines, and conducting end-to-end fraud detection and credit risk analysis across large-scale datasets exceeding 1 million records. Proven ability to identify trends and patterns in data, develop automation solutions, and deliver data-driven recommendations that support strategic decision-making for business partners.

SKILLS

Programming Languages: Python, SQL, JavaScript, C, C++

Data Analysis & Libraries: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Statistical Analysis

Business Intelligence & Reporting: Power BI, DAX, Power Query, KPI Dashboards, Data Visualization, Microsoft Excel (PivotTables)

Databases: PostgreSQL, MySQL

Data Engineering & Tools: ETL Pipelines, Data Cleaning, Data Transformation, Data Validation, Automation Solutions, Web Scraping

Domain Expertise: Fraud Detection, Credit Risk Analysis, Risk Modeling, Dashboard Development, Stakeholder Reporting

PROJECTS

Banking Fraud Detection & Credit Risk Analysis ([Python](#), [Pandas](#), [NumPy](#), [Power BI](#), [DAX](#), [EDA](#)) [GitHub](#) | [LinkedIn](#)

- Analyzed 500K+ banking transactions using Python EDA to identify fraud patterns and high-risk customer segments, improving fraud classification accuracy by an estimated 18%.
- Built interactive Power BI dashboards with DAX measures tracking fraud KPIs, credit risk exposure, and transaction anomalies, enabling real-time risk mitigation decisions for business partners.
- Conducted end-to-end data cleaning, preprocessing, and statistical analysis to validate data quality and ensure accurate risk modeling outputs.

Apple Retail Sales Analytics — 1M+ Records

([PostgreSQL](#), [Advanced SQL](#), [CTEs](#), [Window Functions](#))

[GitHub](#) | [LinkedIn](#)

- Analyzed over 1 million retail sales records using PostgreSQL, applying CTEs, Window Functions, Subqueries, and query optimization to reduce execution time by 40%.
- Identified top-performing products, revenue-driving trends, and customer purchasing behavior, delivering 5 strategic insights to support inventory planning and sales optimization.
- Designed SQL-based analytical workflows to disseminate large-scale data insights, directly supporting data-driven decision-making for stakeholders.

Credit Card Fraud Detection & Risk Analytics Platform

([Power BI](#), [DAX](#), [Risk Analytics](#), [Data Transformation](#))

[GitHub](#) | [LinkedIn](#)

- Built a BI platform monitoring 200K+ credit card transactions for fraudulent activity, customer risk profiles, and anomalies — enabling rapid identification of fraud-prone segments.
- Developed KPI-driven dashboards featuring fraud risk segmentation, transaction monitoring, and performance metrics using DAX, improving reporting accuracy for business partners.
- Performed data transformation and validation routines to ensure data integrity across all analytical reporting pipelines.

Vendor Performance & Inventory Analytics System [\(Power BI, DAX, SQL, ETL\)](#)

[GitHub](#) | [LinkedIn](#)

- Designed a BI solution evaluating vendor performance and procurement efficiency, identifying operational bottlenecks and improving inventory utilization insights by 15%.
- Created KPI dashboards tracking inventory turnover, vendor contribution, and supply chain performance, supporting operational planning decisions for business partners.
- Built ETL routines to organize, transform, and validate procurement datasets, ensuring accuracy and consistency across all analytical reports.

EXPERIENCE

Cinute Digital Pvt Ltd — SEO Intern | Mumbai, India | Feb 2026 – Apr 2026

- Analyzed website performance data to identify trends in search traffic, contributing to a 20% improvement in content engagement metrics across 50+ digital assets.
- Built reporting dashboards to track SEO KPIs and developed automation solutions for content audit workflows, reducing manual review time by 25%.

EDUCATION

Bachelor of Science in Computer Science | Mumbai University, Bhavans College | 2023 – 2026

GPA: 2.6 / 4.0 (converted from 6.3/10.0 CGPA) | Relevant Coursework: Database Management Systems, Statistics, Data Structures & Algorithms, Programming

CERTIFICATIONS

- Responsive Web Design — FreeCodeCamp (April 2025)
- JavaScript Algorithms and Data Structures — FreeCodeCamp (May 2025)
- Mastering Data Structures & Algorithms Using C and C++ — Udemy (April 2025)
